

React Native Developer

Scholly is looking for a React Native Developer to join our team!

The ideal candidate for this position will be highly self-motivated, proficient at transforming concepts into a solid architecture and requirements, meticulously detail-oriented, and able to quickly come up to speed on new technologies.

Responsibilities:

- Design and development of react native applications for iOS and Android
- Contribution in grooming sessions around functionality requirements to provide insight from an architectural/development perspective
- Must follow and promote Agile best practices for development such as continuous integration, unit and integration testing and code coverage analysis.
- Collaboration with Product and Creative teams around UX/UI Design
- Collaboration with QA to define proper functional test strategy
- Execution of established standards in regards to coding, application accessibility (ADA), and unit testing
- Participation in code reviews of their peer's work
- Analyze and troubleshoot issues and defects in both structured and unstructured environments; analyze performance and design inefficiencies.
- Stay abreast of the latest technologies and tools being used to improve software development and delivery.
- Participates in special projects and performs other duties as assigned.

Qualifications:

- Experience with React Native, ReactJS, javascript, other javascript libraries
- Experience with mobile testing, automated tests
- Experience developing against multiple APIs/Data Sources in a single application
- Good understanding of native mobile development
- Excellent written, communication, interpersonal, and problem-solving skills
